

## KIT FORCELLA/CARTUCCE FORCELLA FRONT FORK KIT/FORK CARTRIDGE

I kit forcella FG GUBELLINI SUSPENSION possono migliorare, anche di molto, il comportamento della forcella di serie senza grossi investimenti o complicate modifiche.

Vengono forniti con un ottimo setting di taratura di base, specifico per ogni modello e modificabile secondo le proprie esigenze, grazie a particolari derivati dalle corse. Esistono anche gruppi spillo compressione, adatti a tutte le forcelle Showa o Kayaba, con 38 scatti di regolazione che vanno a sostituire senza modifiche gli spilli originali, che hanno un range di regolazione insufficiente.

The kits FG GUBELLINI SUSPENSION could improve, also highly, the functioning of the original front fork without big changes and saving money.

They are ready to be installed, instructions included. A very good calibration setting is included with the kit, specific for every model, thanks to many details derived from the races.

There are also compression pins groups, fitting to every fork Showa or Kayaba, with 38 adjustable positions meant to replace without any changes the original pins, that don't have a sufficient adjustable range.
